

LITHIUM EP 2 M GREASE

Description:

LITHIUM EP 2 M GREASE is high quality multi purpose lithium base grease blended from solvent refined oils and incorporate multi functional extreme pressure additives, a synergistic mixture of black solid lubricants as well as corrosion and oxidation inhibitors. It is suitable for operating temperatures between – 30°C and 130°C.

Specification:

LITHIUM EP 2 M GREASE conforms to SABS specification 1014.

Application:

LITHIUM EP 2 M GREASE are designed for use in highly loaded plain and roller bearings as well as for shock loading conditions in steel mills. It is suitable for use in the full range of bearing speeds encountered in electric motors, machine and wood working tools, production equipment, textile and paper making industry, generators and all types of vehicles.

The smooth consistency makes these greases ideal for use in centralized lubrication systems and they could be used on ferrous as well as non-ferrous metals.

Characteristics:

Thickening Agent	Lithium
NLGI Classification	2
Work penetration at 25°C	265-295
Drop point °C	180
Timken OK load Kg	> 27
Oil Viscosity at 40°C	200
Recommended Temp Range	-30° to 130°C
Solid Lubricants % - colour	3% - black
